

Insightify Weekly Report - Week 3

Week: March 18 - March 22, 2024

Author: Priya Mehta (Product Manager)

Highlights

Implemented zero-result fallback recommendations.
Reduced average latency by 15% for Android users.
Launched SmartSearch 2.1 patch with improved error handling.

Key Metrics

SmartSearch usage up by 22% week-over-week.
Avg. query latency: 650ms ((down) from 780ms)
Support tickets: 142 total ((down) from 164)

Top Issues

Search input not saving on form reload (Safari only).
Confusion between Filters vs Tags remains.
Zero-results UI state still lacks guidance.

Next Steps

Finalize SmartSearch keyboard shortcut updates.
Deploy multilingual re-indexing patch.
Launch experiment on context-aware autocomplete.
